VETRAFIN S-SERIES

VetraFin S-Series

Sentech's VetraFin S-Series System is a highly transparent, cost-effective steel fin structural glass system for facades with either full-height face glass or horizontal joints.

This proprietary system offers unparalleled flexibility in design geometry and finish options, offering simple lines, minimal connections, and a unique look with no exterior hardware, bolts or plates. It can be used with monolithic, laminated or insulated glass for a wide variety of applications- including curved façade and overhead applications.

- AESS steel construction
- Walls 100'+ with mid-span bracing
- Walls up to 60' tall, without mid-span bracing
- Maximum IGU size with high-performance coatings = 10'-9" x 60'
- Recommended maximum fin spacing = 6' to 8'
- Use w/ monolithic, laminated & insulated facades
