VETRAFIN G-SERIES

VetraFin G-Series

Sentech's VetraFin G-Series System is a highly transparent glass fin façade system. The system features simple lines, minimal connections, and a unique look with no exterior hardware, bolts or plates.

This proprietary system can be used to design facades with insulated glass with any type of soft coat low-e; this feature enables the design of walls with the highest performance values available in the marketplace.

- 316 stainless steel construction
- Walls 100'+ with mid-span bracing
- Walls up to 60' tall, without mid-span bracing
- Maximum fin height without splices = 60'
- Maximum fin spacing/ panel width = 10'-9"
- Maximum IGU height with soft (sputtered) coatings = 60'
- Recommended fin spacing = 6' to 8'
- Use with monolithic, laminated & insulated facades
