VETRAPOINT SERIES

VetraPoint System

Emphasizing transparency, Sentech's proprietary VetraPoint system offers unparalleled simplicity and design flexibility. Our VetraPoint system allows for the utmost architectural creativity in the design process- from connection details to support structure options.

The VetraPoint system can be any combination of glass fins, steel fins, cable trusses, steel trusses or aluminum fins. The system can be used with a wide variety of glass types, including monolithic, laminated and insulated. Fully concealed and embedded fitting options are available. This system can be used to design facade, overhead, floor, entrance and blast and bullet-resistant applications.

- 316 stainless steel construction
- Embedded fittings available for laminated & insulated units
- Counter-sunk or capped fitting applications
- All fittings can be used in vertical or overhead applications
- Use with all tempered glass types (insulated, laminated, monolithic)
- LARR-approved for many glass compositions (Los Angeles County testing)
