VETRASKIN SYSTEM

VetraSkin

Sentech's VetraSkin wall panel system is a next-generation, pre-fabricated glass panel system that offers an unlimited number of color variations and shades, and can deliver varying reflectivity with the inclusion of acid etch glass. Sentech's VetraSkin system is delivered ready-to-mount for ease and speed of installation. The system comes fully engineered and pre-manufactured to suit any application, and is intended for both overhead (ceiling) and wall applications.

The system is designed for redundancy and ease of panel replacement with independent glass units. VetraSkin is available for both jumbo and curved applications, and can be designed for glass panels up to 20-feet tall. The system design includes joints as small as 1/4" and hidden hardware connections that deliver a completely concealed support system. The result? A one-of-a-kind glass wall panel system that softens and adds elegance to any space.

- Unlimited color options
